

REDiSAFE GUARDIAN SERIES

Simple Secure Backup

REDiSAFE Guardian series, a complete and affordable solution that includes hardware and software in one appliance, with the ability of protecting your data automatically, securely and seamlessly.

It caters to enterprises in any industry regardless of size. REDiSAFE protects information stored on desktops, notebooks and servers for fast recovery in the event of disasters such as software viruses, hard disk or system malfunction, theft, power failure, internal sabotage, human errors or natural disasters.

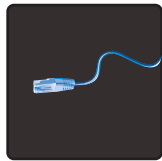

Simple yet Complete Solution for Users and Administrators

Designed for Lights Out Management (LOM) and therefore requires minimum setup, administration and maintenance. Administration of the REDiSAFE Backup Appliance is performed via a simple web browser. User and disk quota management can be assigned to a non-technical administrator. Once the REDiSAFE Backup Appliance is setup, it should require no more attention from the IT administrators.

How REDiSAFE Works

Users are merely 2 steps away from protecting their data securely during their initial setup of REDiSAFE. For first time users, they merely need to (1) select the data they would like to protect; (2) schedule the frequency and time they would like REDiSAFE to run the backup. And in circumstances where recovery of files is needed, users just simply need to select the file they would like to recover, and click on "Recover" to get the file recovered instantaneously.

Connect to REDiSAFE

Install REDiSAFE Client on your workstation

Select folders and schedule backup

Instantaneous recovery

REDiSAFE leverages on technological innovation to provide you with a robust, secure and fast data protection solution. REDiSAFE simplifies backup and recovery processes while making it exceptional easy to use. Now organisations are able to meet with challenging Recovery Time Objectives (RTOs) and Recovery Point Objectives (RPOs).

Key Features

SIMPLIFIED DATA PROTECTION

- Ease of Deployment
- Backup Scheduling
- Incremental Backup
- Automatic & Seamless
- User Initiated Recovery
- Administration Anytime, Anywhere
- Rich Client Features
- Rapid Disaster Recovery
- Familiarity of User Interface
- RAID Protection

COMPREHENSIVE YET FLEXIBLE

- Multi-Platform Support
 - Windows
 - Mac OS
 - Linux
- Multi-Language Support
 - English
 - Simplified Chinese
 - Traditional Chinese
 - Japanese
 - Korean
- Multiple Backup Schedules
- Email Backup (Guardian PLUS)
- Option of Disaster Recovery (Sold Separately)
- Quota Management
- Up to 99 Versions

MULTI-LAYER SECURITY

- Compressed & Encrypted (AES, Twofish, Triple DES)
- Physical Security | Two Token Security System
- Secured End-to-End Data Protection
- User ID & Password | Authentication
- Users' Private & Confidential Vault
- Limited Access to REDiSAFE
- Resilient to Virus and Hacker Attacks

ADMINISTRATOR MANAGEMENT

- Near Zero Day-to-Day Administration
- Backup Quota Configuration
- Omission of Specific File Extension(s)
- Statistic reports on Users' Usage
- Automatic Pruning
- Better Storage Optimisation
